MoviLift

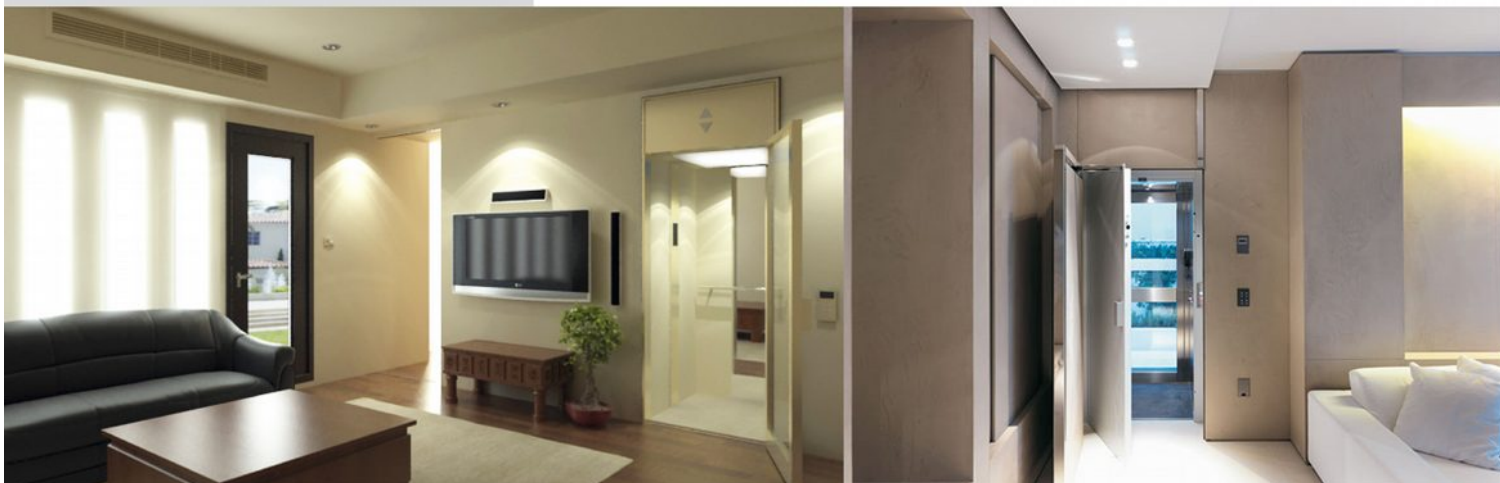

○ What is it

The Movilift lifting platform is suitable for any type of architectural context. It is distinguished by its silence, reliability, safety and ease of installation.

In the event of interruption of the mains supply, the machine automatically returns to the lowest floor.

It can be installed in new buildings or existing buildings and it is possible to provide a metal structure for interior or exterior.

It can be completely customized in coatings and accessories and is a safe and certified product.

○ Technical data

Traction: hydraulic with control unit installed near the shaft, or in a cabinet

Capacity: from 250 kg to 600 kg

Maneuver: maneuver APB or automatic in the cabin and automatic on the floor

Stops: up to 6

Travel: max 12000 mm

Minimum headroom: 2400

Minimum pit: 150 (with linoleum floor or 180 with marble ones)

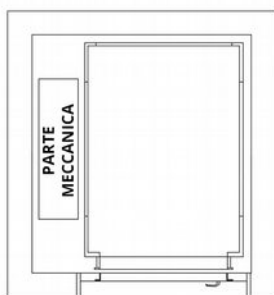

Speed: 0,15 m / s (on request 0,30 m / s - slow lift)

Doors: automatic or swing ones

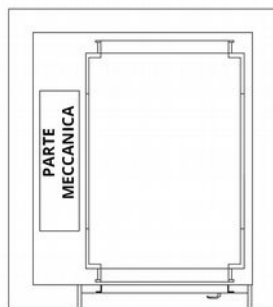

Power supply: 220V - one-phase - 50 hz / 380V three-phase 50 hz

Motor power: from 1.5 to 4 kw

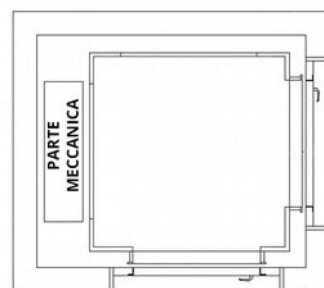

Plant types

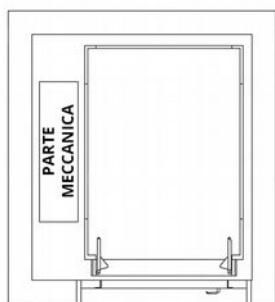

1 single access manual

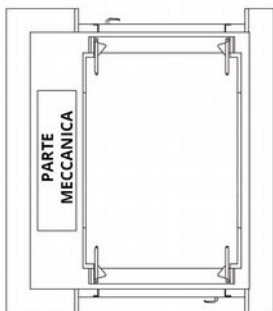

2 manual opposite accesses

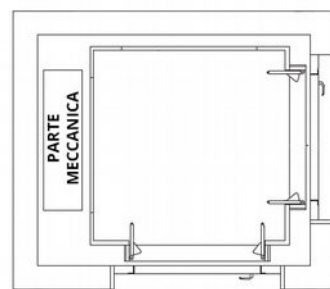

3 manual adjacent accesses

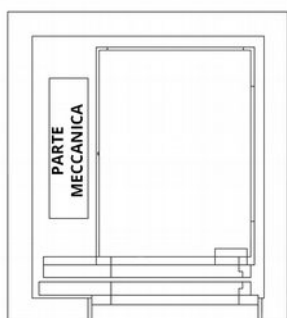

1 semiautomatic single access

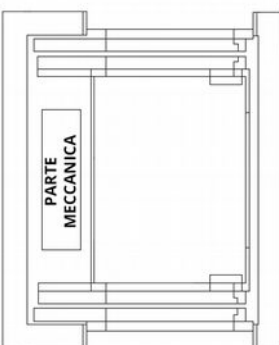

2 semi-automatic opposite accesses

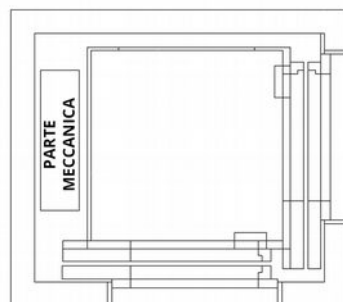

3 semiautomatic adjacent accesses

1 automatic single access

2 automatic opposite accesses

3 automatic adjacent accesses

Standard

Entrances: 1 or 2 opposite or adjacent accesses

Landing doors: hinged with standard window or automatic with central or side opening.

Floor buttons: flush mounted steel plate complete with braille push buttons, open door, alarm and / or display for floor indication

Cabin: walls in plasticized sheet steel with stainless steel finishes, linoleum floor, white 4 LED spotlights ceiling, half-wall mirror with handrail, roof with hatch and photocell barrier.

Car operating panel COP: mechanical side removable column with braille push buttons, open door, alarm maintenance key, LCD display and emergency light / capacity plate

Cabin doors: on automatic platform, finishes are like cabin walls

Miscellaneous: automatic emergency in down movement

features

Options

Hinged doors: blinded, panoramic with transparent glass or custom. RAL painting or steel coating ***. Fire-fighting version EI 60 - EI 120.

Automatic landing doors: 2AT type (two telescopic), 3AT (3 telescopic leaves), 2AO (two opposite central antis), 4AO (four opposite central doors), blind or panoramic. RAL painting, plasticized sheet or steel. Fire-fighting version EI60 - EI 120.

Landing operating panel LOP: enabling calls key, TFT display, floor indicators (out of service, direction arrows, alarm, arriving indicator).

Car operating panel COP: enabling calls key, independent call key, cabin fan switch, cabin light switch, TFT display with customization of the capacity plate with customer logo, loudspeaker cut out, for synthesis.

Cabin doors: in plasticized sheet, steel or panoramic.

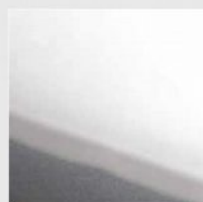

Cabin: full-wall mirror, bidirectional communication device, panoramic walls, special steel finishes. Ceiling with different finishes, vocal synthesis, protection bumper strips. Predisposition for bottom coating.

Supporting structure: press-folded sheet metal for exteriors and interiors with bolted elements. Finishes with RAL painting. Buffering with laminated glass or insulated panels and / or sheets.
